NYSDEC ID #152111

Dear Mr. Dassatti:

As per our telephone conversation today, the cesspools connected to the building at 88 Lamar Street have begun to overflow. Due to contamination noted during the investigation performed at the site, it was recommended in our report that these pools be cleaned out and endpoint samples be obtained.

We are concerned that contaminated material will overflow onto the land adjacent to the building. Therefore, we request that permission be granted to perform an emergency clean-out and sampling as soon as possible.

I look forward to hearing from you on this most urgent matter at your earliest convenience.

Sincerely,

Dawn M. Medaglia
